LIDDELL & SCOTT'S GREEK-ENGLISH LEXICON.

NEW EDITION.

A Greek-English Lexicon. Compiled by HENRY GEORGE LIDDELL, D.D., Dean of Christ Church, and ROBERT SCOTT, D.D., Master of Balliol College, with the Co-operation of Professor Drisler, of Columbia College, New York. Seventh Edition, Revised and Augmented. pp. xvi., 1776. 4to, sheep, \$10.00; abridged edition, small 4to, half leather, \$2.00.

"Facile princeps among Greek dictionaries."—*Academy, London.*

"It is truly a magnificent work, both in its exterior form and in its contents. It would be difficult to say wherein it falls short of the ideal of a Greek-English Lexicon. I shall use it constantly myself, and shall take great pleasure in recommending it to my classes."—Professor W. S. TYLER, Amherst College.

"Very decidedly the best Greek Lexicon for constant service now in the world."—*Nation, N. Y.*

"It is the ripest fruit of modern scholarship."—*Observer, N. Y.*

HARPER'S LATIN DICTIONARY.

A Latin Dictionary founded on the translation of "Freund's Latin-German Lexicon." Edited by E. A. ANDREWS, LL.D. Revised, enlarged, and in a great part rewritten by Charlton T. Lewis, Ph.D., and Charles Short, LL.D., Professor of Latin in Columbia College, New York. pp. xiv., 2020. Royal 8vo, sheep, \$6.50; full Russia, \$10.00.

"It forms a more complete guide to the entire literature than any previous work. In regard to the Latin orthography, the present Dictionary, moreover, claims the attention of students as the only work which embodies the results of recent investigations by philologists like Ritschel, Corssen, Brambach, and others. . . . The present state of the science of etymology is more completely represented in this work than in any previous Dictionary."—*N. Y. Tribune.*

"The Lexicon must supersede all its rivals for common use. . . . It contains many new words. . . . It removes many errors. Orthography, etymology, and accidence have been corrected by the best and latest authorities. Many words are rightly explained which have long misled lexicographers."—J. E. B. MAYOR, "Professor of Latin at Cambridge University, England, in 'Notes and Queries,' London."

[PUBLISHERS' PRICES.]

NOTICE.—In this Catalogue only prices made by publishers themselves are given—retail, if retail, in first column; “net” (wholesale), if “net,” in second column; where a “mailing” percentage is specified by the publisher, the “mailing price” is given in the retail column marked with an asterisk (*), in addition to the wholesale price. HENRY HOLT & CO.'S

IMPORTANT NEW TEXT-BOOKS.

CLARK'S PRACTICAL RHETORIC.

A Practical Rhetoric, English Composition and Revision. By J. SCOTT CLARK, Instructor in Syracuse University. 12mo, \$1.50.

Its main source of inspiration was an attempt to work Herbert Spencer's "Philosophy of Style" in the classroom, the result of which was the accumulation of a body of rules which adapt the principles of that incomparable treatise to actual work with untrained students. The author attempts no impossibilities. He believes that rhetorical training must be largely negative; that it cannot teach "invention," but can develop the ability to arrange and revise. The exercises, which are a leading feature, are treated somewhat after the manner of Abbott's "How to Write Clearly." They deal not with errors that have been committed by authors of reputation, but rather with those that are peculiarly apt to be committed by students in school and college.

JOHNSTON'S HISTORY OF THE UNITED STATES.

History of the United States for Schools. With an Introductory History of the Discovery and English Colonization of North America. By ALEXANDER JOHNSTON, Professor in Princeton College. 12mo, 473 pp., \$1.25.

A history of the United States, and not principally a history of the colonies from which the United States sprang. It is not a story-book, or a picture-book. The author has written in the conviction that what the mass of pupils need is to learn from the history of the past how best to perform the simple and homely duties of good citizenship. Mr. JOHN FISKE says of it: "Incomparably the best short history of the United States with which I am acquainted." The *Nation* calls it "The best school history which has yet been presented to the public."

PACKARD'S ZOÖLOGY—ELEMENTARY COURSE.

First Lessons in Zoölogy. By A. S. PACKARD, Professor in Brown University. 12mo (American Science Series), 290 pp., \$1.00.

In method this book differs considerably from the large books in the series. Since it is meant for young beginners, it describes but few types, mostly those of the higher orders, and discusses their relations to one another and to their surroundings. The aim, however, is the same with that of the others—namely, to make clear the general principles of the science, rather than to fill the pupil's mind with a mass of what may appear to him unrelated facts.

REMSEN'S CHEMISTRY—BRIEFER COURSE.

An Introduction to the Study of Chemistry. By IRA REMSEN, Professor in the Johns Hopkins University. 12mo (American Science Series), 389 pp., \$1.40.

The one comprehensive truth which the author aims to make clear to the student is the essential nature of chemical action. With this in view, he devotes the first 280 pages of a carefully selected and arranged series of simple experiments, employing only the four common elements—Oxygen, Hydrogen, Nitrogen, and Carbon. In these experiments are gradually developed the main principles of the subject. His method is purely inductive; and, wherever experience has shown it to be practicable, the truths are drawn out by pointed questions, rather than fully stated. Next, when the student is in a position to appreciate it, and not at the start, as is usual in elementary treatise, comes a simple account of the theory of the science. The last 150 pages of the book are given to a survey, fully illustrated by experiments, of the leading families of compounds.

WHITNEY'S FRENCH GRAMMAR.

A Practical French Grammar. By WILLIAM D. WHITNEY, Professor in Yale College. (Shortly.)

A practical class-book for academies, high-schools, and colleges. Part first opens with a full account of the pronunciation of the language. In the next forty-two lessons the author unfolds those important facts of the grammar which the student must master as a foundation. The regular verbs are gradually introduced and fully explained, then the more common of the irregular verbs are taken up, and their conjugation exhibited by a new method of arrangement. The exercises carefully avoid the error of bringing in too many new words at a time, but give repeated practice in a carefully-selected vocabulary of common terms. Part second is a more systematic presentation of the facts of French usage, in the order usual in scientific treatises on grammar. Its matter is meant to supplement and extend that of part first. The sentences for translating in this part are all quotations from French authors.

GOODELL'S THE GREEK IN ENGLISH.

First Lessons in Greek, with special reference to the etymology of English words of Greek origin. By THOMAS D. GOODELL, Instructor in the Hartford (Ct.) High School. (Shortly.)

The Greek element of English in conversation, and especially in literature, carries many of the key-words to the thought, and he to whom these key-words are not alive with meaning is at a great disadvantage; and yet mere dictionaries or etymological handbooks alone cannot give what is wanted. *The words in their Greek form, and with some fragment of their Greek associations*, must become somewhat familiar before one can be sensible of that grasp of their English derivatives which will enable one to use those derivatives correctly and fearlessly. The Greek vocabulary surviving in English can be presented in a sort of Greek primer, with its relations to English pointed out; and this is just what this book aims to do. It is not intended to lessen the number of those who shall enter on a full course of study in the Greek language, but it is rather hoped that it may increase that number.

RAND, McNALLY & CO.'S New Series of Educational Maps

ESPECIALLY DESIGNED AND ENGRAVED FOR USE IN SCHOOLS.

**Most Complete, Handsome and Substantial School Maps ever
Published.**

These Maps are distinguished by several new and useful features, being beautifully bold in outline, free from unimportant names, and so distinct that no difficulty is experienced in reading any name. They show the latest geographical discoveries and political changes in every part of the world. They are handsomely and artistically colored, so that the political boundaries can be readily distinguished at a distance. The names of towns are engraved in clear, bold type, and are also indicated by large black dots, so that the series can, if preferred, be used for "outline" maps. The lengths of the principal rivers and the altitudes of the highest mountains are engraved on the maps.

The Map of Canada, United States and Mexico shows the new boundary line between Manitoba and Ontario, and gives to Canada and the great Northwest more accurate prominence than has ever been attempted by any other publishers. The regions traversed by the Greeley Expedition, together with the geographical features of the adjacent parts, are exhibited by the map of North America. The one of South America presents the colonial possessions of European countries, and the boundaries recently established. The contested territory in Afghanistan, the Congo Free State, with its Lakes, Rivers and Missions, and all the late changes made by settlement and colonization in South Africa, are shown on their respective maps. The paths of oceanic currents and the locations of the submarine cables are special features on the maps of the hemispheres. Various colored diagrams showing the area and population of the several great States of the World, their comparative production of cereals, the tonnage of their merchant marines, etc., accompany the maps, making them complete in every respect.

The following are a few of the many educators who heartily endorse the series:
